## DETAILED ACTION

This is a first office action on the merits of patent application S. N. 10/700,419.

### ***Claim Rejections - 35 USC § 102***

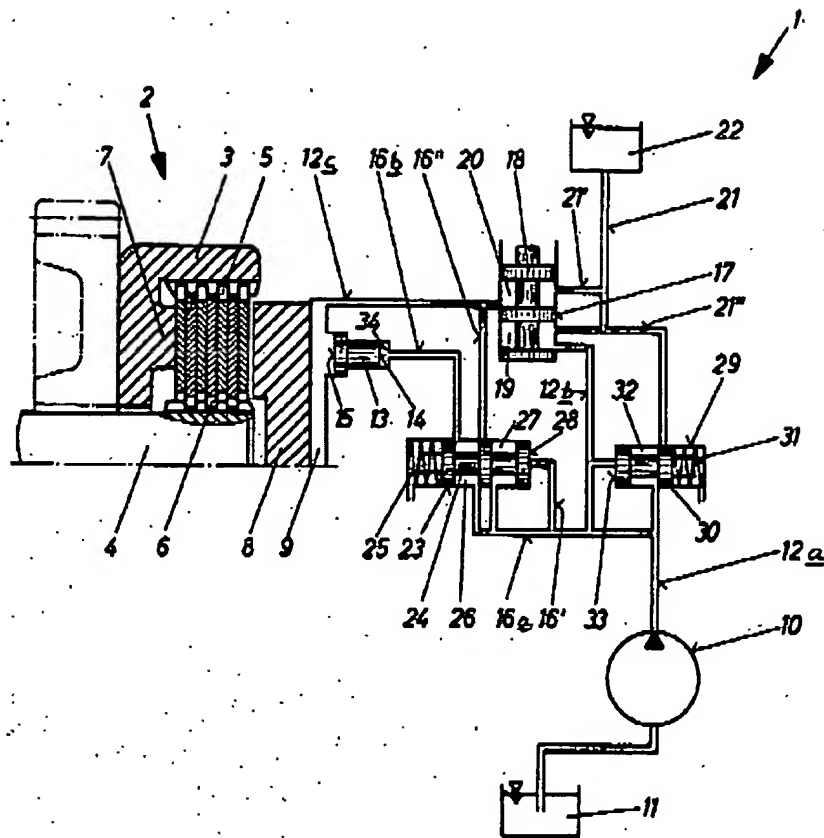

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6-9, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Schacher et al. ('618).

Schacher et al. discloses an apparatus (Fig. 1) for applying and releasing a clutch piston (8) comprising a fill oil chamber having a first (9) and second (34) portions separated by a fill piston (13), a first passage (15), a second passage (16b), a third passage (12c), a fill control valve (24), a transmission line pressure by pump (10) or exhaust by relief valve (29), a spring (25); wherein pressure is controllable and selectively communicated with the third passage through passage/orifine (16").

### ***Allowable Subject Matter***

Claims 4-5 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

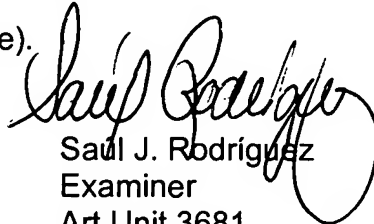

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Braun et al. ('539) and Pavest ('094) disclose other devices for modulating the engagement of a clutch.
